

Core competence

- Data science, Machine Learning & Deep Learning Modeling services
- End-to-end AI Applications development capabilities
 - ML Application development
 - Computer Vision Application development
 - NLP Application Development

Pi Tech Services

- [Data-labeling services](#)
- [Custom AI Application](#)
- [Chatbot services](#)
- ML Model development, optimization & deployment services
- Micro-architecture services
- Cloud deployment services
- [AI Staffing Services](#)

Why Pi Tech?

- Cost-Effective (Reduce cost by 2x, Zero start-up cost)
- A dedicated & highly talented Data Science team comprising of 20+ members
- State-of-the art AI Infrastructure
- Bright delivery record as per the industry standards
- Leadership team holds over 25+ years of industry experience in total

CLARITY AutoML Tool

CLARITY key features

- Data Preparation + Cleaning
 - Data Exploration w/ Pipelines
 - Data Preprocessing
 - Automated data type detection
 - Missing data, handling & reidentification
 - Synthetic data creation for better results
 - Get statistics about distributions of your data
- Algorithm Selection
 - Automated ML task detection based on the data
 - Understanding Feature Importance
 - Hyperparameter Tuning
 - Model Scoring & Iteration
 - Model Optimization
- Model Deployment
- Time series Analysis

CLARITY value Add To ML Process

- Identity & Access Management
- Licensable tool
- Easy Integration with client's software stack
- Data Ingestion APIs, Data organization & Tracking
- Seamless integration with existing DB & BI Tools
- Data Security
 - No need to share data on cloud
- Building Actionable Scenarios
- Scalable solution
- Ongoing progress monitoring
- Cost-Effective (Reduce the ML cost by 2x)
- ML model deployment on the edge devices
 - Continuous model evaluation
 - Result analysis and ML model retraining
 - Easy deployment using Restful APIs
 - On-prem & Cloud deployment
