

Core competence

- Data science, Machine Learning & Deep Learning Modeling services
- End-to-end AI Applications development capabilities
 - ML Application development
 - Computer Vision Application development
 - NLP Application Development

Pi-Tech Services

- [Data-labeling services](#)
- [Custom AI Application](#)
- [Chatbot services](#)
- ML Model development, optimization & deployment services
- Data Sourcing / licensing
- Micro-architecture services
- Cloud deployment services
- [AI Staffing Services](#)

Why Pi-Tech?

- Cost-Effective (Reduce AI development cost by 2x, Zero start-up cost)
- A dedicated & highly talented Data Science team comprising of 20+ members
- State-of-the art AI Infrastructure
- Bright delivery record as per the industry standards
- Leadership team holds over 25+ years of industry experience in total

Sample Chatbot Deployment for Hospitals

The screenshots illustrate a chatbot interface for a hospital. The first screenshot shows the initial greeting: "Welcome to our clinic chatbot." The user asks, "I'd like to see Dr. Barrie on Wednesday." The chatbot responds with available slots for Dr. Barrie on Wednesday, April 24th, and asks the user to choose a preferred hour. The second screenshot shows the user selecting "16:00" and confirming the booking: "I would like to book an appointment with Dr. Barrie on Wednesday, April 24 th , at 16:00". The third screenshot shows the payment options: "Booking Dr. Barrie for 16:00hrs on Wednesday, April 24 th . Would you like to make an online payment, or pay at the clinic in person?" with buttons for "PayPal", "Credit Card", and "Pay at Clinic".
